

Streamline the employee lifecycle with agentic AI for HR

Search across systems & automate tasks in a single, intuitive chat interface

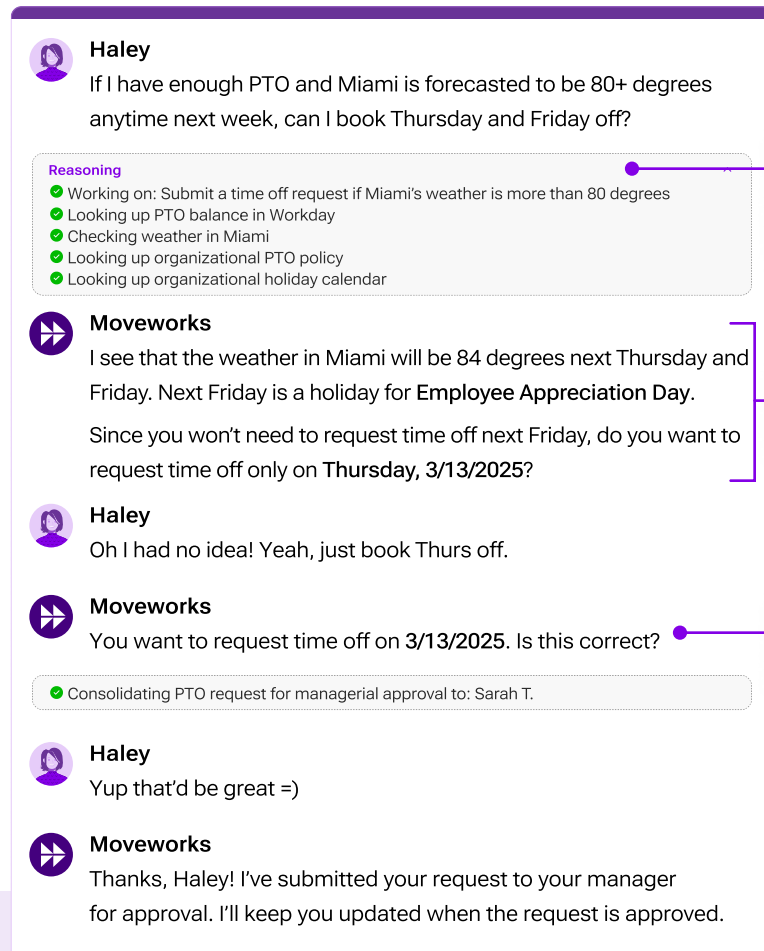

The problem

With data and workflows spread across dozens of siloed systems, it's difficult for employees to find answers and complete everyday tasks. For example, employees must traverse different tools while onboarding, managers can't quickly approve PTO, and leaders get tangled in clunky processes. This hurts productivity and employee experience.

The Moveworks solution

Moveworks solves this with an agentic AI Assistant that eliminates the headaches of juggling multiple HR systems. The Assistant empowers all employees to easily handle everyday tasks – like keeping personal information up to date in your HRIS or checking important policies or approving time sheets – all without the hassle of searching and switching between systems.

Moveworks for HR in action

Haley
If I have enough PTO and Miami is forecasted to be 80+ degrees anytime next week, can I book Thursday and Friday off?

Reasoning

- Working on: Submit a time off request if Miami's weather is more than 80 degrees
- Looking up PTO balance in Workday
- Checking weather in Miami
- Looking up organizational PTO policy
- Looking up organizational holiday calendar

Moveworks
I see that the weather in Miami will be 84 degrees next Thursday and Friday. Next Friday is a holiday for **Employee Appreciation Day**. Since you won't need to request time off next Friday, do you want to request time off only on **Thursday, 3/13/2025**?

Haley
Oh I had no idea! Yeah, just book Thurs off.

Moveworks
You want to request time off on **3/13/2025**. Is this correct?

Consolidating PTO request for managerial approval to: Sarah T.

Haley
Yup that'd be great =)

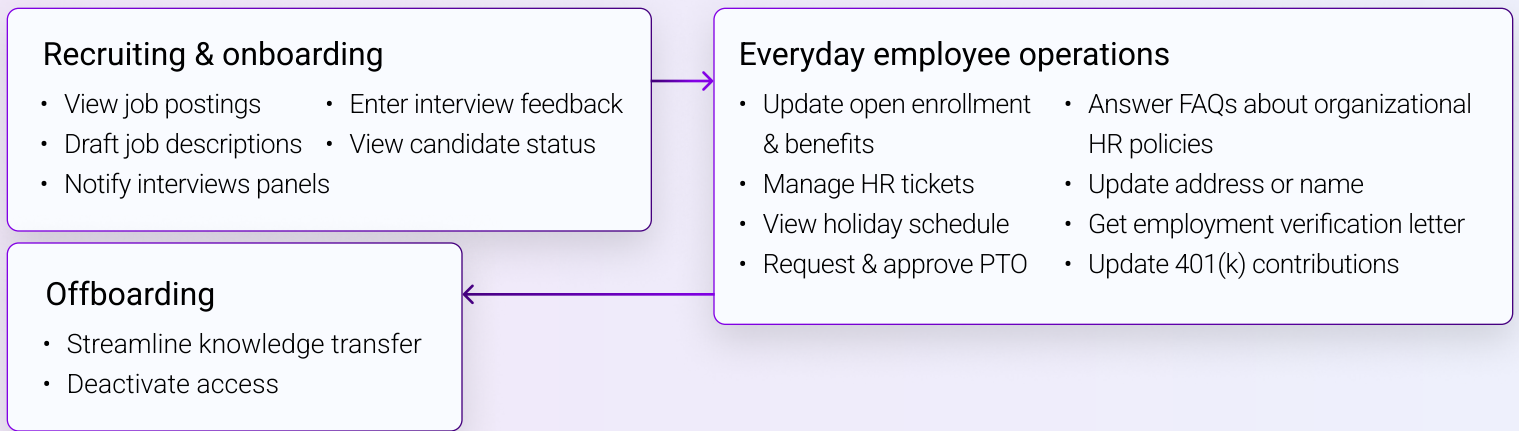

Moveworks
Thanks, Haley! I've submitted your request to your manager for approval. I'll keep you updated when the request is approved.

Moveworks reasons upon employee requests, turning natural language asks into actionable steps that are instantly executed within your enterprise systems

The AI Assistant asks for more details when needed, dynamically adjusting the plan to get to the end goal

Moveworks always secures consent before modifying business records or taking action on behalf of users

Organizations use Moveworks across the employee lifecycle, from hire to retire

Agentic AI transforms business outcomes for HR

Increased:

- New hire retention
- Training participation
- Engagement & employee NPS scores
- Knowledge transfer effectiveness

Decreased:

- Time to fill open roles
- Time to productivity
- Turnover costs
- Time to case resolution

Why Moveworks for HR?
